Understanding and Diagnosing Air Conditioning

This course goes beyond minimum requirements for recovery, evacuating, recharging, and recycling by offering real world examples in diagnosing and repairing A/C electrical, computer / BCMs, Climate control and electronic components. Most of today's vehicles come equipped with electronically controlled A/C systems. Auto AC systems have become more difficult to diagnose using the repair strategies learned from years of servicing R12 and R134a systems. This class/seminar will cover operation and service of today's and tomorrow's air conditioning systems including R1234yf.
