ASE COMPUTER-BASED TESTING

# Speed. Accuracy. Simplicity.

From the cars we drive and work on to the new ways we listen to music and communicate with friends, computer technology is a growing part of our lives. Now, ASE is harnessing the power of that technology to help put your career in high gear.

Administered at hundreds of convenient, secure testing centers across the country, ASE computer-based certification testing was introduced to make everyone's lives easier, more predictable and more rewarding.

## Immediate Results, Greater Scheduling Flexibility ... and More!

Moving ASE certification testing exclusively to a computer-based format provides a number of important benefits to both automotive technicians and shop owners.

### **Immediate Results**

The days of waiting weeks for your test results are over! Your results are delivered immediately upon completion of your test, so you'll save time by knowing exactly where you stand when you leave the testing facility.

### **Greater Scheduling Flexibility**

Offered more frequently than our previous paper-and-pencil tests, computer-based testing takes place in four 2-month windows each year, with more time slots each testing day. You'll spend less time in rush-hour traffic and more time doing the things that are important to you! And shop owners can stagger technicians' testing slots, meaning no more empty shops at testing time.

### **Ease and Accuracy of Testing**

With the look and feel of traditional paper-and-pencil tests, ASE computer-based testing includes clear instructions and improved graphics on diagrams and charts. Plus, computer-based testing results in fewer fill-in errors than paper-and-pencil testing, so you'll have less chance of accidentally submitting an incorrect answer.

### **Comfortable Testing Environment**

Every ASE testing center offers a clean, comfortable environment and helpful staff. You won't feel rushed and — just like paper-and-pencil tests — you'll be able to skip around from section to section. In fact, if you've taken paper-and-pencil tests before, you'll find the new computer-based tests very familiar. And, each CBT test session includes a simple-to-use tutorial to familiarize you with the computer interface.

## Get the Lead Out: Sign up for ASE Certification Testing

To learn more about ASE certification, register for a test, or find the next time testing is offered at a center close to you, visit [www.ase.com](http://www.ase.com) or contact ASE at 1-888-ASE-TEST.

Rise above the crowd and gear up today for a smarter career track.

A recent survey shows that employers find ASE-certified technicians to be more professional, knowledgeable and productive than non-certified techs. So it's no surprise that more than 85% of employers prefer to hire ASE-certified techs.\*
